NORTH-HOLLAND

Author Index—Volume 57

Ashurkov, V.L., 35
Aspden, P., 133

Buchberger, B., 211

Carayannis, E.G., 261
Coates, J.F. 157
Croson, D.C., 35

Dekimpe, M.G., 105

Eto, M., 205

Fox, J.F., 35

Gaines, B.R., 7
Gill, D., 229
Goslin, L.N., 197

Hauptman, O., 1
Hazlett, J.A., 261
Herkert, J.R., 75

Katz, J.E., 133
Kiggundu, M., 1
Kurawarwala, A.A., 169

Lopez, W.H., 225

Matsuo, H., 169
Mejia, L.R., 233
Mokhtarian, P.L., 53

Nielsen, C.S., 75

Parker, P.M., 105
Phillips, F., 205, 257

Saito, H., 237, 249
Sarvary, M., 105
Scott, N.R., 217, 221
Stanek, D.M., 53

Tomczyk, M.S., 1
Trune, D.R., 197

Book Review Index—Volume 57

Linstone, H. A., *Chaotics: An Agenda for Business and Society in the 21st Century* (George Anderla, Anthony Dunning, and Simon Forge), 267

Linstone, H. A., *Growing Artificial Societies: Social Science From the Bottom Up* (Joshua M. Epstein and Robert Axtell), 267

Linstone, H.A., *Would-Be Worlds: How Simulation Is Changing the Frontiers of Science* (John L. Casti), 267

Peter C. Bishop, *Scenarios of U.S. and Global Society Reshaped by Science and Technology* (Joseph F. Coates, John B. Mahaffie, and Andy Hines), 295

Subject Index—Volume 57

Business-university virtual teaming, strategic planning, 261

Canada, The Canadian Networks of Centres of Excellence (NCE) Program, 229
Cellular telephones
  global, new-product diffusion models, 107
  impacts, 133
Center-based telecommuting, home-based vs., 53

Technological Forecasting and Social Change 57, 281–283 (1998)
© 1998 Elsevier Science Inc.
655 Avenue of the Americas, New York, NY 10010

0040-1625/98/$19.00
PII S0040-1625(98)00002-X

Children, future career preparation, 157
Commitment, entry strategies for emerging markets, 35
Communication, emerging role of telecommunication, 1
Computer technologies
  convergence with telecommunications, 7
  integration of telecommunication and, 1
Convergence, telecommunications and computer technologies, 7

Diffusion models, new-product, staged estimation, 105

Economic development, regional, university research, 221
Education, future career preparation, 157
Electronic communication, emerging role of telecommunication, 1
Electronic media technology, impact assessment on professional organizations, 75
Entry strategies, emerging telecom markets, 35

Flexibility, entry strategies for emerging markets, 35
Forecasting, medium-term, product growth models for short life cycle products, 169

Global cellular telephone adoption, new-product diffusion models, 105

Home-based telecommuting, center-based vs., 53

Impact assessment, electronic media technology in professiional organizations, 75
Industry
  The Canadian Networks of Centres of Excellence (NCE) Program, 229
  industrially relevant research, university support, 225
  university-industry partnerships in management research, 57
Information dissemination, electronic media technology impact assessment on professional organizations, 75
Interdisciplinary research organization, Science Technology Engineering Matching Programs (STEMPS), 249
Internet
  emerging role of telecommunication, 1
  origins and growth, 7

Japan
  science and technology, 237
  Science Technology Engineering Matching Programs (STEMPS), 249

Management research, university-industry partnerships, 57
Medium-term forecasting, product growth models for short life cycle products, 169
Mobile communications, impacts, 133

New-product diffusion models, staged estimation, 105

Organizations, electronic communication and information dissemination, 75

Pagers, impacts, 133
Parenting, preparation of children for future careers, 157
Preference models, home-based vs. center-based telecommuting, 53
Product growth models, short life cycle products, 169
Profit/loss analysis, university technology transfer programs, 197

Regional economic development, university research, 221
Research
  activation in universities, 217
  collaboration, The Canadian Networks of Centres of Excellence (NCE) Program, 229

market-driven approach to university technology transfer, 235
science and technology in Japan, 237
Science Technology Engineering Matching Programs (STEMPS), 249
universities and industrially relevant, 225
university-industry partnerships, 57
utilization in universities, 221
vitalization in universities, 205, 211, 249

Science and technology in Japan, 237
Science Technology Engineering Matching Programs (STEMPS), interdisciplinary research, 249
Short life cycle of products, product growth models, 169
Social contribution
reseach results, 249
universities, 205, 211, 221
Strategic-planning, business-university virtual teaming, 261

TARA Symposium, 57
Technology changes, university research activation, 217
Technology transfer, market-driven approach to university, 235
Technology transfer programs, profit/loss analysis, 197
Telecommunications
convergence with computer technologies, 7
electronic media technology in professional organizations, 75
entry strategies for emerging markets, 35
introduction to special issue, 1
mobile communications, 133
new-product diffusion models, 105
Telecommuting, home-based vs. center-based, 53
The Tsukuba Advanced Research Alliance (TARA) International Satellite Symposium, March 1997, 205

Universities
business-university virtual teaming for strategic planning, 261
The Canadian Networks of Centres of Excellence, (NCE) Program, 229
industrially relevant research, 225
market-driven approach to technology transfer, 235
primary mission, 235
regional economic development and research, 221
research activation, 217
research utilization, 221
research vitalization, 211, 249
revitalizing research, 205
social contribution, 211, 221
technology transfer programs, 197
university-industry partnerships in management research, 57

Virtual teaming, business-university, strategic planning, 261

Wireless personal communication, impacts, 133
Workers, future career preparation, 157
World Wide Web, origins and growth, 7
